

WELCOME TO HORJUL

WHERE IS IT?

SLOVENIJA

Horjul valley extends west from Ljubljana between the alpine and dinaric karst scenery. We are near the capital city, but at the same time the beautiful nature gives us peace and opportunities for recreation in the fresh air.

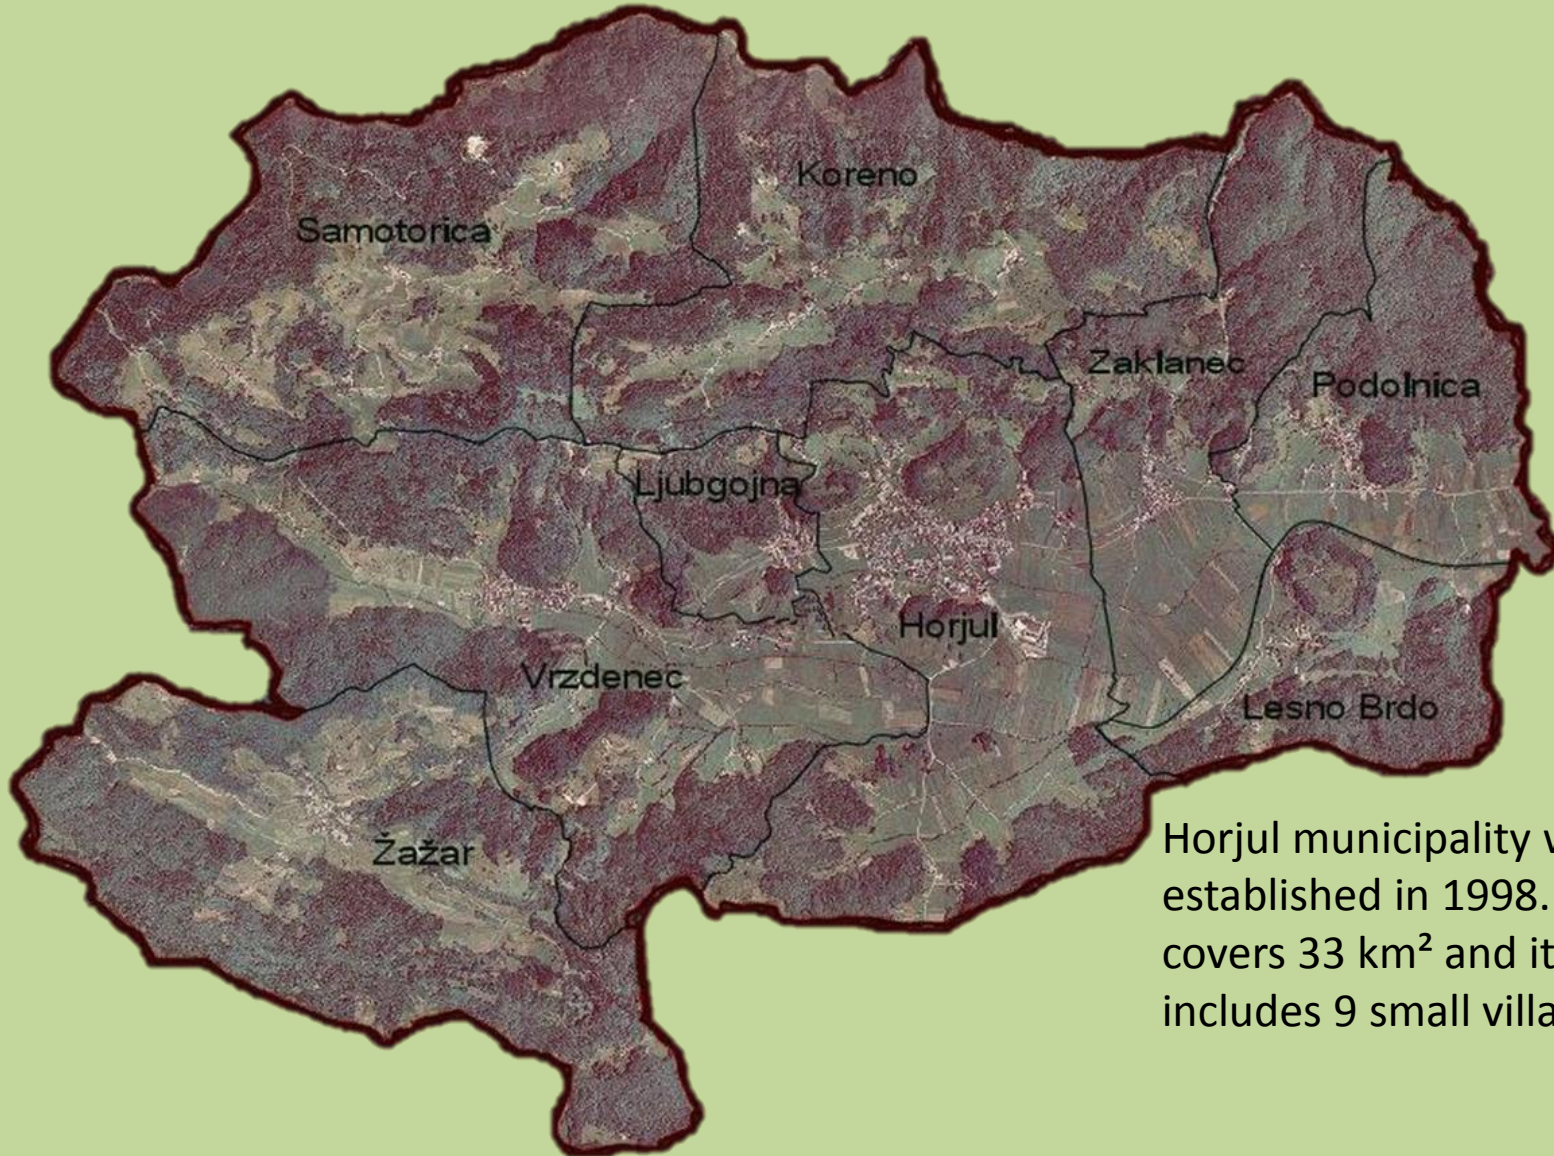

Valley lies on the edge of marshes, so meadows are often flooded when there's a lot of rain.

At the bottom of the moist valley we can see a beautiful flower *močvirska logarica*, also called marsh tulip.
